

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

WINONA, MINN.

J. M. HOLZINGER

NOTES ON CURRENT BRYOLOGICAL LITERATURE

Raphidostegium caespitosum.—In the Journal of Botany, March, 1920, Mr. H. N. Dixon has an article on this species, of 8 pages, at the end of which he cites no fewer than 58 synonyms. A sweeping series of reductions.

J. M. HOLZINGER

MISCELLANEOUS NOTES

Camptothecium nitens var. falcatum (Peck) Burnham.—This combination was made in the July number of THE BRYOLOGIST 23: 54, July, 1920; but is not the correct name for this var., *C. nitens* var. *falcifolium* Ren. e Nichols, in Rhodora, Vol. 15, p. 12?

NORTHAMPTON, ENGLAND

H. N. DIXON

Camptothecium nitens var. falcifolium Ren. (*C. nitens* var. *falcatum* (Peck) Burnham).—In connection with the preceding note Mr. Burnham contributes the following:

Mr. H. N. Dixon of Northampton, England has called my attention to the fact that the combination *Camptothecium nitens* var. *falcatum* (Peck) Burnham which was made in THE BRYOLOGIST 23: 54, July, 1920, is superseded by the name *Camptothecium nitens* (Schreb.) Schimp., var. *falcifolium* Ren., published by Dr. Geo. E. Nichols, Notes on Connecticut Mosses, Rhodora 15: 12, Jan., 1913. Mr. Dixon is correct. The variety *falcatum*, altho described by Dr. Peck in the N. Y. State Cab. Rep. 22: 105, 1869, was never published, altho the herbarium name *falcatum* is written on the sheet of Dr. E. C. Howe's Fort Edward specimen in the State herbarium. Number 308 in C. F. Austin's Musci Appalachianiani is Dr. Howe's Moreau plant, the variety *falcifolium* Renault.

CORNELL UNIVERSITY, ITHACA, N. Y.

S. H. BURNHAM

A Correction.—Mr. Wm. R. Maxon, of the National Museum, has called attention to an error in Mr. Standley's article, "Sphagnum in Glacier National Park, Montana," in the January (1920) number of THE BRYOLOGIST, p. 5. In the fifth line of the article the words "On the east slope" should read "On the west slope."
